Security Policy Presentation

Developer: *[Insert your name here]*

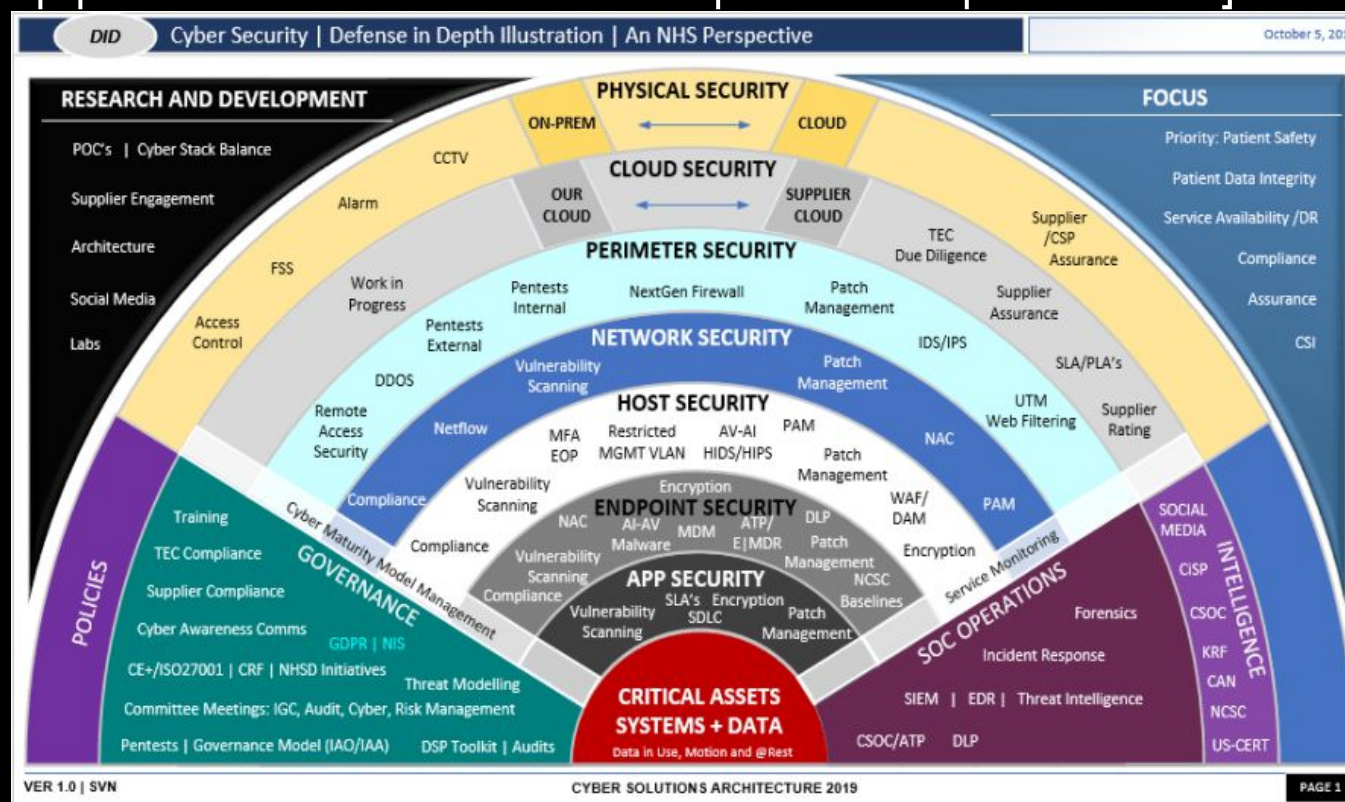

[Complete this template by replacing the bracketed text with the relevant information.]

Green Pace

OVERVIEW: DEFENSE IN DEPTH

[Introduce your security policy. Explain why it was needed and how it will be used to support the defense-in-depth best practice.]

THREATS MATRIX

[Populate the Threats Matrix table and provide explanations to summarize of all of your security risks.]

Likely [Insert text here.]	Priority [Insert text here.]
Low priority [Insert text here.]	Unlikely [Insert text here.]

10 PRINCIPLES

- [List the 10 principles. List the coding standards that apply to each principle. This should demonstrate the alignment between principles and standards.]

CODING STANDARDS

- [List the 10 coding standards. Explain your own ranking system for vulnerabilities, using specific details from the coding standards in your security policy.]

ENCRYPTION POLICIES

- [Explain the policies for encryption in flight, at rest, and in use.]

TRIPLE-A POLICIES

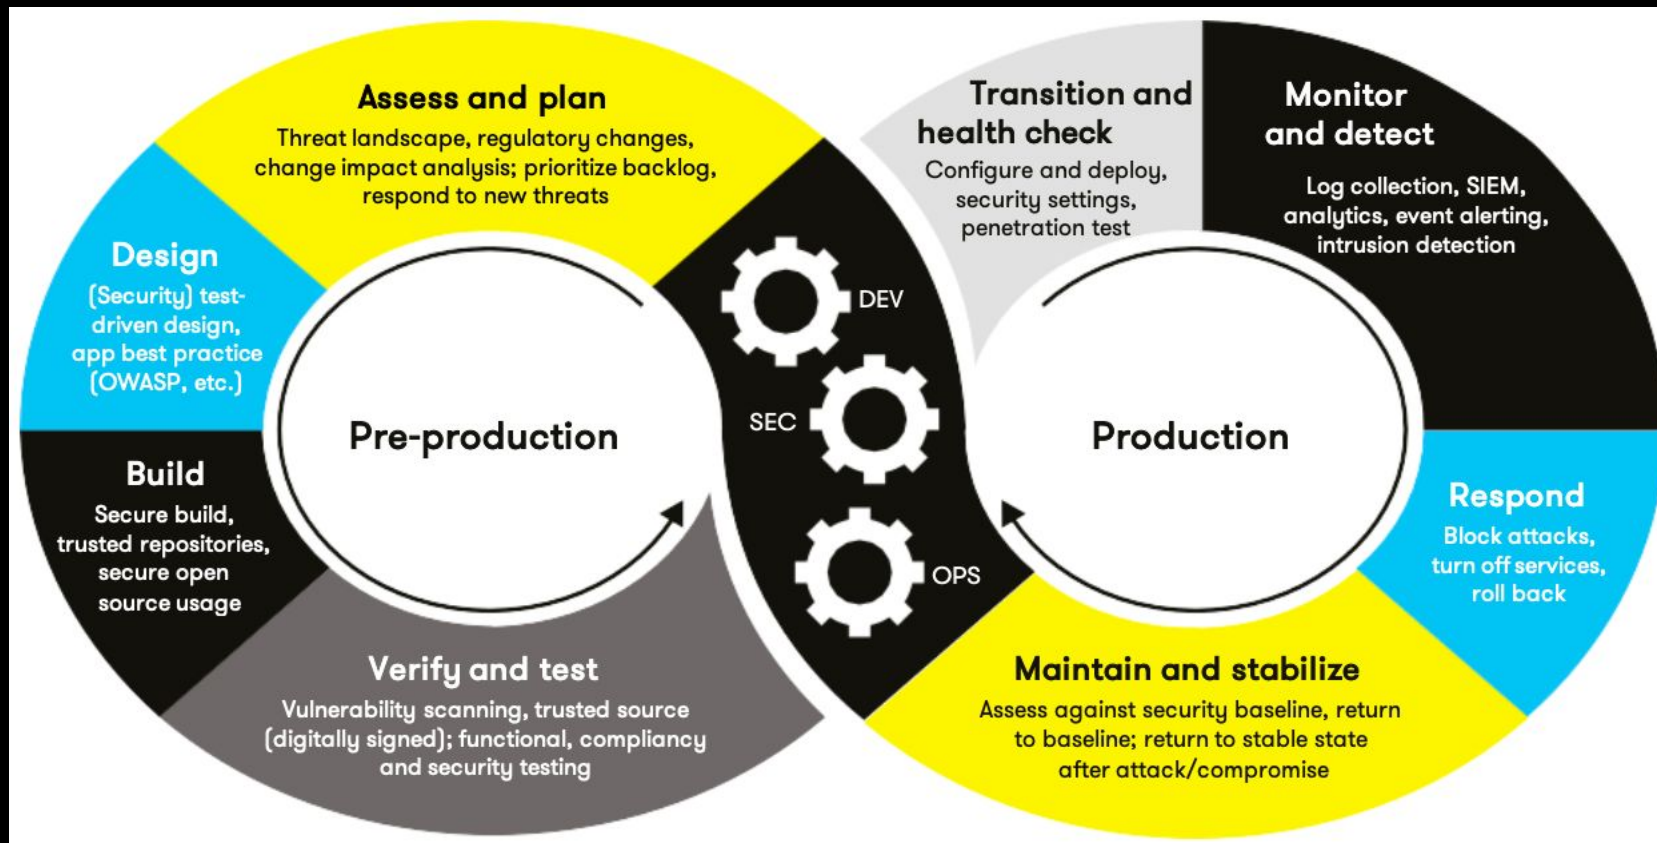

- [Explain the policies that support authentication, authorization, and accounting.]

Unit Testing

[Identify the coding vulnerability you chose to test. Include four to six mixed tests for positive and negative results. Include a slide for each test. Use the question for the test as the title. Show the results.]

AUTOMATION SUMMARY

TOOLS

- [Explain the DevSecOps pipeline.]
- [Summarize the external tools and where and how they are used in the context of the diagram.]

RISKS AND BENEFITS

- [Describe the problems, the solutions, and the risks or benefits involved if you act now or wait. Where is the strategy lacking? What are the risks of using this strategy? Which steps should be taken?]

RECOMMENDATIONS

- [Identify gaps in the security policy.]

CONCLUSIONS

- [Identify standards that should be adopted to prevent future problems.]

REFERENCES

- [Provide APA-style references with links to resources, articles, and videos that you used in your presentation.]
